# What is the GoSportz SAFE PACK ?

## GoSportz offers a Comprehensive cleaning & disinfection Service

Is your Sports Arena safe for use? Are you taking special measures to combat COVID – 19? We at GoSportz are, and we want to help you.

During these uncertain times, it's more important than ever to bear in mind what your users will value most when they return to your facility. Unbeatable hygiene and correct disinfection of your facility will convey a feeling of security and confidence.

Though the origin of this virus is not yet been confirmed, it is now known to spread from person to person.

Standard recommendations to prevent infection include regular hand washing, covering the mouth and nose when coughing and sneezing, and maintaining social distance.

However, these measures may not be enough to ensure your facility is totally free of COVID-19.

We at GoSportz have it covered.

We have devised a system to ensure that your facility is free of any viruses & is ready for use.

## **GoSportz' Safe Pack**

**What is the GoSportz Safe Pack? From now on, your sports arena is going to need:**

- Constant deep cleaning and disinfection
- Contagion prevention methods
- Clearly marked floors to indicate social distancing

**What does the GoSportz pack include?**

- Deep cleaning & disinfection
- Ozone disinfection
- Floor marking to follow social distancing

# 1. DEEP CLEANING & DISINFECTION

Before reopening, you'll need to make sure your facility is properly sanitised. GoSportz uses medically approved disinfectants; But once you open your doors, you'll need to constantly clean and disinfect the entire centre and all the materials that come into contact with users and staff.

# 2. OZONE DISINFECTION

Alongside the standard cleaning and disinfecting products, we at GoSportz offer an ozone disinfection process that eliminates viruses and bacteria present in the air or deposited on surfaces - including COVID-19 - by up to 99.99%. It's the ideal method to ensure your installations are safe and fully disinfected.

# 3. FLOOR MARKING

One of the preventive measures that needs to be taken at your facility is to ensure everyone maintains 1.5 to 2m of separation between each other. This affects common areas, reception, and changing rooms, but especially the training / play areas etc.

The best way to optimise your space and make sure you adapt to the new recommendations is to make it as easy as possible by indicating it on the floor. Our markings will ensure that the areas are clearly visible ensuring the 'social distancing' required.

**GoSportz offers a range of high performance and durable surfaces viz. Glass and Polyurethane seamless surfaces which are hygienic and easy to clean.**

GoSportz also offers hygiene maintenance tools viz. foot sanitizer dispensers, face masks, face shields etc. We can also supply the disinfectant liquids (for floor & equipment cleaning) as well as Ozone Generators of different capacities based on your requirements.

**Please contact our GoSportz Sales Team for further details.**
